

Universal Electronics Inc. Wins Five Red Dot Design Awards

May 1, 2020

SCOTTSDALE, AZ, May 1, 2020

Universal Electronics Inc. (UEI) (NASDAQ: UEIC), the global leader in universal control and sensing technologies for the smart home, has received five 2020 [Red Dot Awards](#), one of the most prestigious international design awards, in the Product Design category. Products from UEI's consumer brand, [One For All](#), won four of the five awards.

The award-winning products were designed by UEI's design team in the Netherlands, part of the global [Designovation](#) team which creates product designs based on user insights and innovative technology. Led by Rex Xu, Director of Design and User Experience, the team in the Netherlands works closely with UEI's design offices in the U.S. and Hong Kong to ensure all products truly reflect global trends in design and technology.

"Winning five Red Dot Awards is a true honor and a testament to our design team's exceptional talent."

Rex Xu, Director of Design and User Experience

Design is one of UEI's key differentiators and we always create our designs with the user experience in mind. The team works under clear guiding principles of our successful Designovation formula which creates honest product designs based on true consumer insights applying the latest technology and design trends.

reddot winner 2020

Two of One For All's TV stands were recognized with 2020 Red Dot Awards

The [Tripod Universal TV Stand](#) fits televisions up to 65 inches, can swivel a true 360 degrees and blends into any corner with natural chestnut or oak wooden legs for a modern look.

The One For All [Falcon Universal TV Stand](#) supports televisions up to 70 inches and is designed to accommodate soundbars, streaming boxes and game consoles connected to the television. With its fabric skinned storage cover at the back of the television, cables are completely out of sight.

One For All also won two Red Dot awards for its market-leading digital TV antennas

The Amplified Indoor TV Antenna features leading reception technology in a beautiful fabric skinned housing. With its homey design, it can hang on the wall, stand or lie flat while allowing for maximum channel coverage.

The darker colored [Amplified Indoor TV Antenna](#) offers a stylish look and unique signal level indicator that blends into the fabric housing. This ensures optimal signal and maximum number of available channels.

Kita premium Android TV voice remote control

The fifth Red Dot Award is for UEI's Kita premium Android TV voice remote control specifically designed for service providers with advanced video services that want a simplified user experience. In addition to supporting voice control and dedicated streaming app keys, this remote control features adaptive control which interacts with the television and only shows users the keys they need. It uses rechargeable technology in a slim housing, saving multiple batteries over the life of the product.
