The [UEI TIDE Smart Thermostat](#) is a white-label home climate control with an interface that is centered around a large full-color display that intuitively navigates using a precision jog dial.

Its minimalistic design and intuitive interface make the product easy to install, use and maintain. It is also a smart home hub, interoperable with a variety of digital assistants such as Alexa and Google. It includes a suite of sensors that provide feedback on occupancy, humidity, temperature, door or window openings. The product is designed with integrated self-help capabilities via a virtual assistant that is available at the device display and on a smartphone application. The product is expected to be available in the Fall of 2022.

The [Quadpod Universal TV Stand](#) is a unique piece of living room furniture that is made from ecological materials of wood, aluminum and fabric to give the stand a distinctive character to fit the interior home. The simple design makes the mounting process seamless and provides a rotation function to watch TV from every angle of

Universal Electronics Wins Three Red Dot Design Awards. The global leader in wireless universal control solutions for home entertainment and smart home devices has received three Red Dot awards. the room. The product design offers space to mount additional devices to the TV and easily connects to a soundbar, game console, or other streaming devices. The product is shipping under the leading [ONE FOR ALL](#) brand and is estimated to be available in the USA and Europe in the Summer of 2022.

The [Smart Streamer Remote](#) is targeted to users that want simplified control and watch video on both traditional TV cable boxes as well as streaming devices. The keypad has dynamic backlight keys that show the numeric keypad when watching live TV. This intuitive feature minimizes the key clutter and does not compromise functionality. Additionally, it offers three programmable app keys that can be customized by connecting the remote to a smartphone. With online streaming apps such as Netflix, Hulu or HBO, the user connects to the correct shortcut keys to the remote established for ongoing use. This [ONE FOR ALL](#) product is estimated to be available in the USA Summer of 2022 and Europe Fall of 2022.

All three products were designed by UEI's leading [Designovation](#) team, which creates innovative product designs that combine deep user insights with great aesthetics and inherent sustainability. "Winning three Red Dot awards in one year clearly speaks to the talent we have on our team of dedicated and innovative designers," said Rex Xu, Director of Design and User Experience at UEI who leads the global Designovation team out of their Californian design studio.

In recent years, UEI has received several Red Dot Awards for a range of products from remote controls to audio-video accessories. This year, the Design team has expanded its success into the smart thermostat category. The Red Dot is established internationally as one of the most sought-after quality marks for outstanding design with annual competitions for Product Design, Brands and Communication, and Design Concept. Red Dot Award submissions are evaluated by a jury of independent designers, design professors and journalists.

All three products as well as the [ONE FOR ALL](#) brand are registered trademarks of Universal Electronics Inc. All trademarks appearing herein are the property of their respective owners.
