The new system is completely reimagined to make automated shading simpler, more reliable, and more scalable. It is built on Bluetooth Low Energy wireless technology which provides an increased operating range and improved reliability with real-time, two-way communications. It also streamlines the installation process regardless of whether a single shade install is desired, or an entire home shade system.

“PowerView Gen 3 is key to making our automated shading system truly scalable, with faster installation time and ease of use,” said Scott Stephenson, Director of Product, Motorization at Hunter Douglas “We have collaborated with UEI for their expertise in wireless connectivity and scalability in IoT products, which they clearly demonstrated in the development process.”

“Our relationship with Hunter Douglas is key to our core home automation business and with this product, we are bringing a scalable solution that meets the high expectations of Hunter Douglas' dealers, installers, and consumers,” said Hrag Ohannessian, SVP of Sales for Home Automation and Security at UEI.

The updated PowerView Remote is designed to fit in Hunter Douglas' iconic Pebble Remote, creating a stylish and

highly engineered means of controlling the PowerView shades at the touch of a button. The uniquely designed Pebble Remote is offered in a variety of colors allowing homeowners and interior designers to mix and match the Remote with Hunter Douglas' broad offering of shade styles and fabrics.

The new system also features the PowerView Gen 3 Gateway that facilitates connectivity with the home Wi-Fi router to provide enhanced system performance as well as voice control using Google Assistant and Amazon Alexa. In addition, the gateway allows integration with third-party control systems from top manufacturers.

Information regarding PowerView Gen 3 availability can be found at [hunterdouglas.com](https://hunterdouglas.com).
