May 7, 2015

- Increased net income 16% over first guarter 2014 -
- Maintains long-term financial outlook of average annual sales growth of 5% to 10% and average earnings growth of 10% to 20% -

SANTA ANA, Calif.--(BUSINESS WIRE)--May 7, 2015-- Universal Electronics Inc. (UEI) (NASDAQ: UEIC) reported financial results for the three months ended March 31, 2015.

Paul Arling, UEI's Chairman and CEO, stated: "During the first quarter of 2015, we performed as expected with net income increasing 16% compared to the first quarter of 2014. We continued to maintain strong relationships with our customers in subscription broadcasting, OEMs and smart device manufacturers to integrate both our traditional remote control solutions as well as our newest innovations into their current and future devices. In fact, many of our customers are focusing on introducing new, more differentiated remote controls that provide consumers with increasingly sophisticated capabilities including new connectivity protocols, voice control navigation and new design aesthetics, among others. While offering consumers more advanced technologies has been a longstanding trend in the home entertainment industry, it is now happening more quickly and more broadly than ever before. While in the short term we expect to see below average order volumes as some of our customers deplete existing inventories in advance of their new product rollouts, in the second half of 2015 we expect to begin benefitting from this growing trend."

"Our strategy to build relationships with key customers in targeted geographies has served us well for nearly 30 years. By attracting brands in regions that represent the highest growth potential, we have been successful in winning new customers and taking share in subscription broadcasting, consumer electronics and now game consoles, smart TVs, as well as smart devices. The market is once again evolving, and we continue to be at the forefront of changing trends in home entertainment by ensuring we develop the innovative solutions that proactively address the needs of our customers and consumers," concluded Arling.
